

**No Rx nor  
VFD  
Needed!**

**One Bottle Treats 90 Gallon Of Water**

## **Are You Tired Of Throwing Away Eggs Every Time You Treat Your Hens For Worms?**

### **All-Natural Zyfund® A Helps Offset Worm Related Issues With No Egg Discard!**

- ◆ Zyfund A is a proprietary, all-natural supplement formulated to help break down the natural defenses of intestinal worms and their eggs.
- ◆ This makes them more susceptible to attack by the birds immune system, stomach acids and bacteria in the gut that can harm intestinal parasites.
- ◆ Administer 6 drops per gallon of fresh water 1 week out of every month when worms can infect your birds.
- ◆ Unlike other synthetic products used in poultry for worms that require you to throw away eggs for 2-3 weeks each month you treat, Zyfund A allows you to continue eating the eggs.
- ◆ Currently used successfully in large commercial organic and natural certified layer flocks across the United States.
- ◆ Zyfund A is a safe, natural way to offset worm related issues and help you meet your goal to produce healthy, wholesome food for your family.
- ◆ For additional information visit our website or call our office.
